Rules on letting this property		
Total floor area	50 square metres	

You can read guidance for landlords on the regulations and exemptions.

Properties can be let if they have an energy rating from A to E.

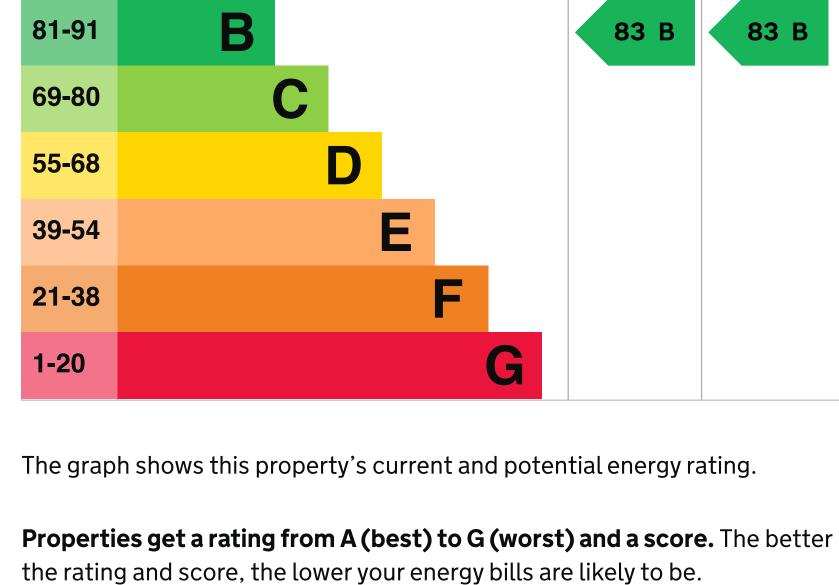

Energy rating and score

See how to improve this property's energy efficiency.

Score **Energy rating** Current

This property's energy rating is B. It has the potential to be B.

92+

For properties in England and Wales:

 the average energy rating is D • the average energy score is 60

Breakdown of property's energy

performance

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Features in this property

Description Rating Feature Wall Cavity wall, as built, insulated (assumed) Very good

Window High performance glazing Very good Main heating Boiler and radiators, mains gas Good

Programmer, room thermostat and TRVs Main heating control Good Hot water Good From main system Lighting Low energy lighting in all fixed outlets Very good N/A (another dwelling above) Roof Floor N/A (another dwelling below) N/A Secondary heating None

The primary energy use for this property per year is 95 kilowatt hours per

water and lighting.

Primary energy use

square metre (kWh/m2).

About primary energy use

of your energy bills. You could **save £0 per year** if you complete the suggested steps for improving this property's energy rating.

An average household would need to spend £531 per year on heating, hot

water and lighting in this property. These costs usually make up the majority

This is **based on average costs in 2024** when this EPC was created. People

living at the property may use different amounts of energy for heating, hot

How this affects your energy bills

Heating this property Estimated energy needed in this property is:

• 984 kWh per year for heating • 1,770 kWh per year for hot water

This property produces

Changes you could make

changes. This will help to protect the environment. These ratings are based on assumptions about average occupancy and

energy use. People living at the property may use different amounts of
