## Rules on letting this property

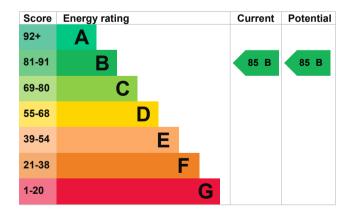

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlordguidance).

# **Energy rating and score**

This property's current energy rating is B. It has the potential to be B.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature                 | Description  | Rating       |
|-------------------------|--|--------------|
| Walls                   | Average thermal transmittance 0.27 W/m²K   | Very<br>good |
| Windows                 | High performance glazing   | Very<br>good |
| Main heating            | Community scheme   | Good         |
| Main heating<br>control | Charging system linked to use of community heating, programmer and at least two room stats | Good         |
| Hot water               | Community scheme   | Good         |
| Lighting                | Low energy lighting in all fixed outlets   | Very<br>good |
| Air tightness           | Air permeability 3.4 m³/h.m² (as tested)   | Good         |
| Roof                    | (other premises above)   | N/A          |
| Floor                   | (other premises below)   | N/A          |
| Secondary heating       | None   | N/A          |

### Primary energy use

The primary energy use for this property per year is 70 kilowatt hours per square metre (kWh/m2).

# How this affects your energy bills

An average household would need to spend **£544 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £0 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of heating, hot water and lighting.

### Heating this property

Estimated energy needed in this property is:

- 912 kWh per year for heating
- 1,631 kWh per year for hot water

#### More ways to save energy

Find ways to save energy in your home by visiting <u>www.gov.uk/improve-energy-efficiency</u>.

| Environmental impact of this property  |                 | This property produces  | 0.8 tonnes of CO2 |

| This property's current envi<br>rating is B. It has the potent   |                 | This property's potential production  | 0.8 tonnes of CO2 |
| Properties get a rating from A (best) to G (worst)<br>on how much carbon dioxide (CO2) they<br>produce each year. CO2 harms the environment. |                 | You could improve this property's CO2<br>emissions by making the suggested changes.<br>This will help to protect the environment. |                   |
| Carbon emissions   |                 | These ratings are based on assumptions about  |                   |
| An average household<br>produces   | 6 tonnes of CO2 | average occupancy and energy use. People<br>living at the property may use different amounts<br>of energy.                        |                   |

## Changes you could make

The assessor did not make any recommendations for this property.

<u>Simple Energy Advice has guidance on improving a property's energy use.</u> (<u>https://www.simpleenergyadvice.org.uk/</u>)

## Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

## Who to contact about this certificate

#### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's nameNimco AliTelephone020 3603 1600Emailinfo@hodkinsonconsultancy.com

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.
