Total floor area	131 square metres
Property type	Detached nouse

Rules on letting this property

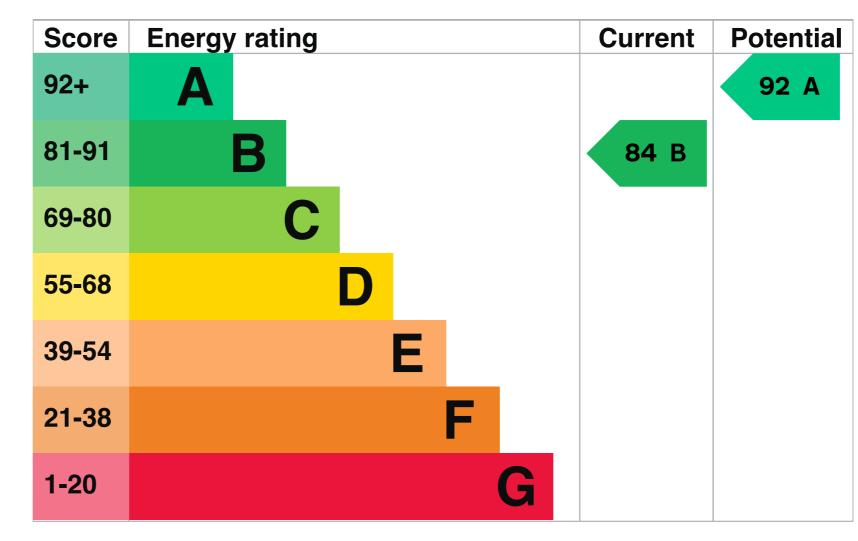

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions.

Energy rating and score

This property's energy rating is B. It has the potential to be A.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

the every second second realization is D

For properties in England and Wales:

the average energy rating is Dthe average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for

features the assessor could not inspect.

Pating

Feature	Description	Rating
Walls	Average thermal transmittance 0.21 W/m²K	Very good
Roof	Average thermal transmittance 0.09 W/m²K	Very good
Floor	Average thermal transmittance 0.14 W/m²K	Very good
Windows	High performance glazing	Very good
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in all fixed outlets	Very good
Air tightness	Air permeability 4.5 m³/h.m² (as tested)	Good
Secondary heating	None	N/A

The primary energy use for this property per year is 75 kilowatt hours per square metre (kWh/m2).

Primary energy use

square metre (kWh/m2).

About primary energy use

How this affects your energy bills An average household would need to spend £458 per year on heating, hot

water and lighting in this property. These costs usually make up the majority of your energy bills.You could save £0 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2021** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

4,168 kWh per year for heating1,793 kWh per year for hot water

Impact on the environment This property's environmental impact rating is B. It has the potential to be A.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An average household produces 6 tonnes of CO2

This property produces

This property's potential production	0.7 tonnes of CO2
You could improve this property's CO2 emissions by changes. This will help to protect the environment.	, ,

1.7 tonnes of CO2

£3,500 - £5,500

£371

energy use. People living at the property may use different amounts of energy.

These ratings are based on assumptions about average occupancy and

Steps you could take to save energy

Step 1: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

Typical yearly saving

► Do I need to follow these steps in order?

Potential rating after completing step 1
